

### Amendments to the Claims

This listing of claims replaces all prior versions, and listings, of claims in the application.

### Listing of claims:

1. (Currently amended) A UV-curable resin composition for bonding substrates of an optical disk, one or both of which have a total reflection film or a translucent reflection film comprising silver or a silver alloy, characterized in that the UV-curable resin composition comprises, as essential components, an epoxy (meth)acrylate (A), 2,2-dimethoxy-1,2-diphenylethan-1-one and a mono- to trifunctional (meth)acrylate monomer (E) other than (A), a monofunctional (meth)acrylate compound (C) containing a hydroxyl group, and a (meth)acrylate phosphate compound (D), provided that the composition does not comprise a urethane (meth)acrylate, wherein the mono- to trifunctional (meth)acrylate monomer (E) is dicyclopentanyl di(meth)acrylate.
2. (Cancelled)
3. (Cancelled)
4. (Cancelled)
5. (Cancelled)
6. (Previously presented) The UV-curable resin composition according to any one of claims 1 to 3, which has an electrical resistivity of  $1000 \text{ M}\Omega\cdot\text{cm}$  ( $\text{M}\Omega=10^6\Omega$ ) or less at  $25^\circ\text{C}$ .
7. (Previously presented) A bonded optical disk in which two disk substrates are allowed to adhere with a UV-curable resin composition according to any one of claims 1 to 3.

8. (Cancelled)

9. (Previously presented) A bonded optical disk in which two disk substrates are allowed to adhere with a UV-curable resin composition according to claim 6.
